What's on when?

Hear from the experts

LuxLive isn't just about seeing and experiencing, it's also about learning. And this year's programme features more experts, more projects, more debate and even more insight in no fewer than 80 talks, debates and panel discussions. There are streams for each of the key sectors that are feeling the effects of the LED revolution plus dedicated sessions on financing, warranties, emergency lighting and technical updates. To plan your day, find out what's on when by looking at the full programme overleaf.

Latest tech

At LuxLive you'll meet global market leaders in lighting, all under one roof and at one time. Get the inside track on the latest product innovations. See who's exhibiting this year by visiting luxlive.co.uk

Great reasons to visit LuxLive

- **MEET** the global market leaders including Thorn, Zumtobel, Cree, Trilux, Gooee, TamLite
- **LEARN** from the experts in 80+ talks, demos and panel discussions
- **HEAR** from major clients about high profile lighting projects
- **SEE** the latest ground-breaking kit from 250+ top brands

Lux is calling on lighting people to share pictures of the worst lighting you've seen. We want to see the most overlit, underlit, glary, shadowy, ugly, electrically unsound and just plain weird lighting installations that you've had the misfortune to come across.

Nominate an entry by emailing ray.molony@luxreview.com. We'll share the best – sorry, worst – in this fun session and present the awards to the winners. If they show up, that is.

What's hot and what's not?

The Lux team will be picking its favourite new bits of lighting kit from the past year and will demo them live in the Lux Arena, putting you ahead of the game. Not to be missed!

Thursday 2.30pm

Internet of Things

A new and exclusive feature at LuxLive, the IoT experience is your chance to see how the world of lighting and big data are set to merge and start another revolution in lighting. See what this means for your business and how it is going to drive customer engagement and service provision. From retail to healthcare, transport to residential the IoT experience is a must see feature!

Late night opening

Don't forget, LuxLive is open until 9pm on Wednesday for the lighting industry's biggest networking bash, giving you the chance to extend your day and enjoy a drink with exhibitors and colleagues.

Register online for FREE entry www.luxlive.co.uk/register

Come with questions, leave with answers!

There's a revolution going on in lighting and helping you to keep ahead of the curve is LuxLive, Europe's largest annual lighting event. Free to attend it takes place on **18-19 November at ExCeL London**.

Ripping up the rule book, LuxLive brings together all the latest innovations in this fast-moving sector. Its extensive programme of expert talks, debates and panel discussions will scrutinise the pros and cons of the latest lighting tech and will get under the bonnet of some of the UK's most challenging lighting projects.

All this plus the big names will be out in force, with 300 exhibitors showing the latest lighting kit and energy-saving controls.

LuxLive - the facts

Dates and times:

Wednesday 18 November 0900 - 2100

Thursday 19 November 0900 - 1700

Venue:

ExCeL London. Please refer to the reverse of this leaflet for directions.

Admission:

Admission is free of charge. Simply register for your pass at www.luxlive.co.uk/register or scan the QR code

What's on at LuxLive? It's all free-to-attend - just register now at www.luxlive.co.uk/register

Wednesday 18 November

09:20 General • Lux Arena

How much could Britain save by embracing low-energy lighting?

Lux's "lighting economist" Dave Tilley crunches the numbers and works out how much money could be saved across the UK by adopting the latest and most efficient lighting technology. You'll be surprised by what's possible!

09:30 General • Tech Theatre

Electrical Distributors Association meeting

A meeting of the Electrical Distributors Association. Also open to non-members.

09:30 Hospitality & Leisure • Theatre 2

Case study: The Britannia

Laura Mackay of MBLD explains how the largest cruise ship to be built is now fully lit by LEDs and has reduced energy consumption by more than a third.

09:50 General • Lux Arena

Experts answer your lighting questions

Voltimum's panel of lighting experts, including representatives of the major lighting manufacturers, will be on hand to answer any and all questions on how to achieve great things with lighting.

10:00 Retail • Lux Theatre 2

Case study

A lighting case study in a boutique store that led to an uplift in sales.

10:00 General • Lux Theatre 1

BIM for beginners - Create better lighting with building information modelling

Building information modelling is supposed to make it easier to design efficient, effective schemes and avoid unexpected problems. But how do you make the most of it? Independent lighting designer Adam Glatherine explains.

10:30 Retail • Lux Theatre 2

How to achieve flawless lighting for make-up counters

One of the biggest problems that make-up brands face in retail is customers bringing things back because they don't like the colour. Top lighting designer Paul Nulty reports on new research conducted with a major global cosmetics brand on how lighting can seal the deal in retail.

10:30 Large Estates • Lux Theatre 1

10 things I wish I'd known before starting my LED rollout

LED rollouts can reap big benefits - but getting them right isn't easy. Richard Felgate, formerly energy manager for the company behind pub chains All Bar One and O'Neill's, reveals the key mistakes to avoid.

10:50 Workplace • Lux Arena

Panel discussion: Office lighting - Time to throw out the rule book?

For too long, offices have suffered from unimaginative lighting that slavishly followed the guidelines without thinking about the environment they created. Our expert panel considers whether we should chuck out the rule book.

11:00 Hospitality & Leisure • Lux Theatre 1

Case study: Wahaca

Lighting designers Kate Wilkins and Sam Neuman reveal how lighting is boosting the brand of Mexican restaurant chain Wahaca.

11:30 Healthcare • Lux Theatre 1

LEDs and public health: The latest research

John O'Hagan of Public Health England presents findings from new research funded by the Society of Light and Lighting on LED lighting and its implications for health.

11:30 General • Lux Arena

Cool Wall

Which luminaire designs are achingly cool and which ones are just a bit... meh? In this lively and popular session, our expert panel give their views and place their choices on Lux's Cool Wall.

11:30 Education • Lux Theatre 2

Case study: schools

Our expert presents a cutting-edge lighting study from a UK school.

12:10 Funding • Lux Arena

Finding the funding for your lighting upgrade

How can businesses overcome the upfront cost of investing in the latest low-energy lighting and controls? Experts discuss the various approaches available.

12:30 Workplace • Lux Theatre 1

Case study: Sainsbury's Digital Lab

The "digital lab" at Sainsbury's London headquarters is a high-tech environment with a futuristic lighting scheme to match - Andrew Bissell of Cundall and Simon Waldron of Sainsbury's talk us through it.

12:30 Workplace • Lux Theatre 2

Creating healthy workplace lighting with controls

How you can use lighting controls cleverly in the workplace to save energy and make workers more comfortable and more productive? Ed Wilkes of Zumtobel explains.

12:45 General • Lux Arena

The internet of things: should we believe the hype?

The 'internet of things' is this year's buzzword in the world of lighting. But is it about to transform the way that we use lighting, or is it all just hot air? Our experts debate the issue, including Francois Girodolle of Google's Nest Labs, Akshay Thakur of Cisco, and Simon Coombes of Goeco.

13:00 General • Lux Theatre 1

How dynamic modelling can help you design great lighting that meets Part L requirements

There are a number of ways to make sure you meet the energy efficiency requirements of Part L of the Building Regs. Neil Foster of Couch Perry Wilkes explains how dynamic modelling can make it easy.

13:00 Healthcare • Tech Theatre

Lighting and dementia: the latest thinking. An ILP session

Lighting designers are perfectly placed to take the lead in the design of care environments for dementia. David McNair, a chartered lighting engineer asks why more designers have not embraced daylight when designing buildings.

13:20 Retail • Lux Arena

The secrets of Tesco's massive LED rollout

An exclusive presentation and interview with the team behind the UK's biggest retail lighting rollout - covering nearly 1,500 shops. Matt Love, lighting manager at Tesco, explains how he's achieved annual energy savings of 76 gigawatt-hours (yes, you read that right), saving the company millions of pounds, without compromising on the look and feel of Tesco stores.

13:30 Healthcare • Lux Theatre 1

Case study: Why one London hospital is investing £1 million in new lighting

Guy's and St Thomas' NHS Trust is investing more than £1 million in lighting that it hopes will save energy and improve health. Alexandra Hammond, the woman in charge of the project, explains.

13:30 Outdoor • Tech Theatre

Could your lighting be disturbing bats? An ILP session

Are your lighting schemes causing harm to protected bat species? Jo Ferguson, built environment officer for the Bat Conservation Trust, explains how this can happen and what you can do to help prevent it.

13:30 General • Lux Theatre 2

Controls for all budgets

The choice doesn't have to be between a sophisticated all-singing all-dancing system and a light switch. In between, there's a whole range of control options to suit all budgets. Controls expert Jeremy Turner explains how.

13:50 Hospitality & Leisure • Lux Arena

Panel Discussion: When LED upgrades go bad

Dingy bars with doty, glarey LEDs, blueish lights replacing the warmth of halogen... we've all seen terrible examples of lighting upgrades in the hospitality sector that struck the wrong balance between energy efficiency and ambience. But if you avoid a few key pitfalls, lighting is still one of the easiest and quickest ways to slash energy bills. Our experts reveal how to do it right.

14:00 Outdoor • Tech Theatre

SLL Masterclass: Lighting for public spaces

As more people live in cities, there is a renewed interest in creating spaces for people, including for pedestrians at night. Mike Simpson of Philips explains how technology is enabling lighting to transform public spaces, increasing engagement and creating a richness that can make these spaces great.

14:00 Workplace • Lux Theatre 2

Esos - Take the opportunity to get your energy use down

Myles McCarthy of the Carbon Trust discusses the most common opportunities for cost-effective energy savings, the barriers to implementation - which aren't just financial - and how to overcome them.

14:00 Hospitality & Leisure • Lux Theatre 1

How Da Vinci himself helped design the new lighting for The Last Supper

Discover how a revolutionary LED lighting installation has transformed the way people see Leonardo Da Vinci's The Last Supper - and how Da Vinci's own feeling for light informed the design. With Piergiorgio Ceregoli of iGuzzini, the designer behind the scheme.

14:30 Education • Lux Arena

Dealing with a sprawling university lighting estate: tips from the experts

Universities own huge amounts of property, often on sprawling campuses with a mix of old and new buildings. Managing the lighting is tough. Our panel of experts, including Alan Syme of Mitie and Dan Lister of Arup, tell you how to take the pain out of it.

14:30 Healthcare • Lux Theatre 2

Case study: How to light for dementia

You've heard about the science of how light affects the body, now here's a real-life example of how it's being put into practice. Daniel Stabenau of Trilux explains the innovative lighting scheme for dementia patients at the Maria-Hilf Hospital in Germany.

14:30 Outdoor • Tech Theatre

SLL Masterclass: Lighting for architecture - the outdoor environment

A comfortable and stimulating outdoor environment is usually the result of a combination of factors. As designers, specifiers and users, how can we determine and make best use of these factors with the aid of the new SLL LG6 guide? Kevin Stubbs of Thorn explains.

15:00 Hospitality • Lux Theatre 2

Case study: The Fera restaurant at Claridge's

This stunning new restaurant in a converted art deco space at Claridge's in London uses a number of clever lighting tricks to create a beautiful atmosphere, with the minimum of fittings visible. Katerina Chanioti of Lighting Design International talks us through the Lux Award-nominated scheme.

15:00 General • Tech Theatre

SLL Masterclass: Form and function in harmony: lighting the interior

How does light react to different spaces, surfaces, and colours? Can we use this to add to the dynamic appearance of a space - changing over time and seasons, improve quality and reproduce colour accurately with the aid of the new SLL LG6 guide? Helen Loomes of Trilux explains.

15:10 Healthcare • Lux Arena

Panel Discussion: How can we make healthier lighting a reality in Britain's hospitals?

New technology holds the promise of lighting that promotes health and wellbeing. But tight budgets, a lack of guidance and complicated lighting estates makes real-life applications of this technology few and far between. Our panel discuss how to change things.

15:30 Retail • Lux Theatre 2

Overcoming the barriers to lighting upgrades in high-street retail

Retailers have begun to embrace LED lighting to save energy and improve their stores. But a lot of high-street stores have yet to make the switch. Andy Bolitho, policy advisor at the British Retail Consortium, looks at the factors holding them back, and how to overcome them.

15:30 Education • Lux Theatre 1

How schools can grasp the energy-saving opportunity of lighting

Schools in the UK can tap into funding opportunities to invest and repair the long-term benefits of energy-saving lighting. Colin Lawson of manufacturer Tamlice explains how, and why schools need to grasp the opportunity.

15:30 General • Tech Theatre

SLL Masterclass: The future of lighting is smart

Roger Sexton of LED module maker Xicato presents a vision of smart lighting, with two-way communication as a key element. It describes which functions can be integrated into smart luminaires and how. It details means of communication including usage of the Bluetooth Low Energy protocol. Wireless lighting control and data retrieval for energy monitoring, fast maintenance diagnostics and extended warranties based on real data are demonstrated.

15:50 General • Lux Arena

Li-Fi vs Wi-Fi

In this session, organised in partnership with the University of Strathclyde's Intelligent Lighting Centre, we pit Wi-Fi technology against the new alternative based on light: Li-Fi. Harald Haas and Geoff Archenhold of Li-Fi pioneer PureLiFi go up against experts from the world of Wi-Fi.

16:00 Retail • Tech Theatre

Workshop: The future of LED lighting in retail

This workshop will bring together retailers and technology suppliers to discuss how the latest cutting-edge lighting kit is going to transform the shopping experience. Which technologies are hot and which are not? And what can the lighting industry do to better help retailers?

16:00 Education / Large Estates • Lux Theatre 1

Case study: Manchester Metropolitan University

Facility managers take note; this is the story of a university that ranked 91st on the league table of green universities, and was catapulted to the top. John Hindley, MMU's head of environmental strategy, explains how lighting helped.

16:00 Office • Lux Theatre 2

Case study: Centrica Estates energy performance contract

Energy performance contracts can help you take control of your energy use. Jennifer Neal, lighting specialist in British Gas's energy performance business, discusses the opportunities and presents a case study in which lighting energy was slashed by 70% at a seven-storey office building in Cardiff.

16:30 General • Lux Arena Dragons' Den

In this ever-popular format, entrepreneurs present their weird and wonderful lighting innovations to LuxLive's panel of dragons. We've got a hydrogen-powered outdoor light, the light with a tiny environmental footprint, and even a light that claims to run on no energy at all. Yes, you heard us right.

17:30 General • Lux Arena The Bad Lighting Awards

New for 2015: LuxLive is calling on the lighting world to share with us pictures of the worst lighting you've seen. We want to see the most overlit, underlit, glary, shadowy, ugly, electrically unsound and just plain weird lighting installations. We'll share the best - sorry - the worst and present the awards to the winners. If they show up, that is.

18:30 General • Lux Arena Intelligent lighting

Our panel look at the possibilities presented by intelligent lighting. Introduced by Dietmar Zembrot, chief technical officer of Trilux.

19:00 **Arena party**

Thursday 19 November

09:30 General • Lux Arena Lux Awards: Where are they now?

When we hand out Lux Awards, people often ask us how we know the winning projects will stand the test of time. So, with the Lux Awards in its fifth year, we decided to look back and see how some of the lighting schemes we honoured in the past are faring now.

09:30 General • Lux Theatre 2 Connected lighting

In the future, lighting will be intelligent and connected. Learn from the leading companies in the field how technology is changing - and how this will benefit users.

09:30 Testing • Tech Theatre Get your product claims independently verified

LIA Laboratories' new 'Verified' scheme aims to give specifiers confidence, by confirming that lighting products do what they say on the tin. Mark Salt, managing director of LIA Laboratories, explains how the scheme will help tackle confusion and miss-selling in the lighting business.

10:00 Industrial • Lux Arena Panel Discussion: Taking the pain out of maintaining industrial lighting

Our expert panel discuss the challenge of maintaining lighting in industrial settings, and offer their top tips on how to do it.

10:00 Social housing • Lux Theatre 1 How to make your 2D bulkheads brighter, smarter and cheaper to run

Britain's housing estates and industrial sites are full of thousands of 2D bulkhead fittings that need to be regularly maintained. Andy Davies of Harvard Engineering explains how retrofit solutions for bulkheads allow you to reap the benefits of LEDs and smart controls.

10:00 Industrial • Lux Theatre 2 Case study: Royal Mail

John Bradshaw, engineering and technical services manager at Royal Mail, talks us through the rollout of LEDs and controls to 16 UK mail centres.

10:00 Recycling • Tech Theatre The WEEE regulations - are you up to date?

Nigel Harvey, CEO of specialist lighting recycling scheme Recolight, gives an update on the regulations for recycling waste electrical and electronic equipment (WEEE), and what you need to know about "dual use" products.

10:30 General • Lux Arena Society of Light and Lighting Young Lighter of the Year: The Final and the Jean Heap Bursary Update

The four finalists for the title of SLL Young Lighter of the Year present their papers to a panel of distinguished judges. Topics include circadian lighting in offices, and light poverty in the developing world. The winner will be announced at tonight's Lux Awards! Feride Sener Yilmaz will also give her 6 month update on her £2000 Jean-Heap Bursary Award

10:30 Outdoor/procurement • Lux Theatre 1 The government's plan for procuring outdoor lighting: what you need to know

The rapid rise of LED, and the grand product claims made by lighting manufacturers, can make life difficult for those in procurement. A new guide aims to help those in central government procurement pick the right outdoor lighting. And for manufacturers - learn what you need to do to keep winning those government contracts. Tony Howells of the Department for Business, Innovation and Skills will be joined by Peter Hunt of the LIA; Joe Ernst-Herman of the Crown Commercial Service, Ian Borthwick of the IET and Gareth Pritchard of Highway Electrical.

10:30 Outdoor • Lux Theatre 2 Walsall Borough Council's £14m rollout

Our expert will present this major outdoor lighting case study revealing the latest best practice.

10:30 Tech (drivers) • Tech Theatre An introduction to driver-on-board LED modules

Dr WenTao Kuang, managing director of Kosnic Lighting, explains how 'driverless' (driver-on-board) LED modules and their associated control peripherals enable emergency capability, motion and light sensing, and wireless control.

11:00 Tech (LEDs) • Tech Theatre Quantum dots and how they'll revolutionise colour in lighting

Heard of quantum dots? They're tiny semiconductor crystals, which can fine-tune the colour of light from LEDs. LED experts Marl and Nanoco explain how, and reveal what it means for lighting.

11:30 Outdoor / procurement • Lux Theatre 1 Procuring public lighting: what buyers want and what the market offers

11:30 Outdoor • Lux Theatre 2 How to upgrade your heritage lighting

Learn how to bring your old fittings up to date with the latest technology, while maintaining the same ambience.

12:00 Commercial • Lux Theatre 2 Putting a number on human-centric lighting

We all know that the right light is good for us, making us happier, healthier and more productive. But to put this knowledge into practice, we need to be able to measure and quantify it, so we can tell the really effective technologies from the gimmicks. Katherina Wulff from the University of Oxford gives an update on efforts to achieve this. In association with the European Commission's Lighting for People project.

12:30 Transport • Lux Arena Panel Discussion: Do regulations stifle good lighting design at railway stations?

Ever tried dimming LEDs? It's pretty hit and miss. Controls expert Jeremy Turner pulls together a mixed bag of light sources, dimmers and transformers, and connects them up before your eyes, to see what happens.

12:30 General • Lux Theatre 1 Warranties on lighting products: How not to fall through the loopholes

Warranties are important. But watch out: some warranties on LED lighting products are more about protecting the seller than the buyer. Top lawyer Paul Stone explains how to dodge the loopholes that can make your warranty worthless.

12:30 Commercial • Lux Theatre 2 Putting a number on human-centric lighting

Our expert speaker gives an update on how to measure and quantify lighting's effect on the human body.

13:00 Large estate/ industrial • Lux Theatre 1 Case study: High-mast lighting at a dock

Our experts Kevin Dyas of Dyas Electrical and Stewart Weaver of Kingfisher Lighting present a case study of low-energy high-mast lighting at a major UK dock.

13:00 General • Tech Theatre LEDs that beat halogen for colour

An expert from leading manufacturer Lumenpulse AlphaLED explains how the latest LED technology can outperform traditional technologies for colour rendering.

13:10 General • Lux Arena Lamps behaving badly - live!

13:30 General • Lux Theatre 1 How to futureproof your spec

Andrew Bissell explains how the team at CundallLight4 planned ahead for the development of LED technology when designing lighting for a defence training camp in South Wales. Learn how to make sure you don't lose out due to future changes in technology, and how to justify the initial cost outlay.

13:30 Transport • Lux Theatre 2 The changing tunnel lighting standards landscape

Tunnel lighting expert John Randis will assess the current standards landscape and evaluate the state of both current and new national standards. He'll look at the issues, pending changes and potential multi-discipline improvement initiatives.

13:30 Tech (LEDs) • Tech Theatre 5 things we didn't know about LEDs a year ago

David Scott-Maxwell of Forge Europa gives an update on the rapid evolution of LED technology, and what it means for you.

13:50 Outdoor • Lux Arena Panel Discussion: Is smart streetlighting everything it's cracked up to be?

Streetlights of the future won't just be streetlights, apparently. They'll also be communications nodes, with all manner of sensors and connectivity to support smart cities. But how big an impact is this really set to have? Graham Colclough of the EU-backed "humble lamppost" project, and a panel of experts, thrash it out.

14:00 Industrial • Lux Theatre 1 Case study: industrial lighting

Our expert speaker presents a standout industrial lighting case study.

14:00 Rail • Lux Theatre 2 Introducing the London Underground's new design guide

Top lighting designer Paul Nulty explains how the Tube is incorporating lighting into its new station design guidelines.

14:00 Controls • Tech Theatre The potential of Power over Ethernet

Akshay Thakur of Cisco explains how powering light fittings through Ethernet cables is set to revolutionise lighting control.

14:30 General • Lux Arena Tech demo: Six bits of kit we love this year

The Lux team picks its favourite new bits of lighting kit from the past year and demos them live in the Lux Arena. Not to be missed!

14:30 Outdoor • Lux Theatre 2 Case study: streetlighting

Our expert will present this major outdoor lighting case study revealing the latest best practice.

14:30 Emergency lighting • Tech Theatre Do you know if your emergency lighting is compliant with the law?

Will your emergency lighting do its job if your building loses power? Are you sure? David Wright, chairman of emergency lighting body ICEL, explains what you must do to comply with the law.

15:00 Industrial • Lux Theatre 1 Case study: Q Park

Andrew Cronin of Nualight presents a case study of innovative lighting in a multi-storey car park.

15:10 Outdoor • Lux Arena Panel Discussion: Does lighting cut crime?

Manufacturers love to claim that their lights will make us safer. But the latest evidence suggests otherwise. What's the real truth about lighting and crime? Phil Edwards, an expert on transport and health from the London School of Hygiene & Tropical Medicine debates with other experts.

15:30 Outdoor • Lux Theatre 1 Case study: streetlighting

An exemplar case study of cutting-edge low-energy streetlighting.

15:30 Rail / Transport • Lux Theatre 2 Case study: Rainhill Station

Euan Hilton of Northern Rail will discuss how the stations smart new LED system has improved customer experience as well as delivering excellent energy saving results.

15:30 General • Tech Theatre Product lifetime: The data you need to ask for

Our expert explains how to make sure your LED products will last.

15:50 General • Lux Arena Dragons' Den

In this ever-popular format, entrepreneurs present their weird and wonderful lighting innovations to LuxLive's panel of dragons.

16:00 Financing / Outdoor • Lux Theatre 1 Find the funding to upgrade your streetlights

It's estimated that Britain could save £77 million by upgrading all its streetlights to energy-saving LEDs. But how do you get the money? Iain Watson, director of energy efficiency at the Green Investment Bank, explains how the bank can help.

16:00 Testing • Tech Theatre Certification marks to build trust in LED lighting products

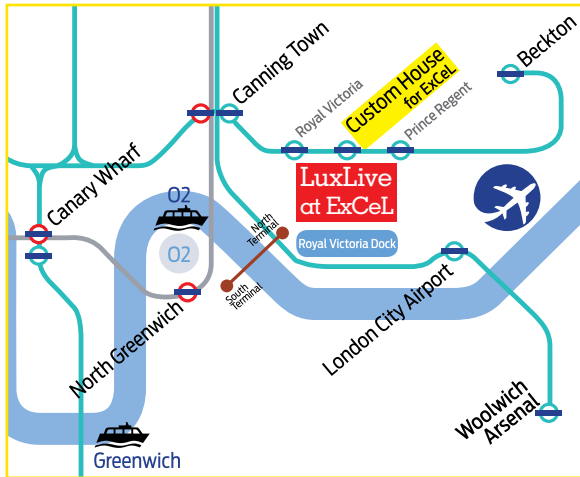

With the rapid expansion of LEDs, the supply chain has been disrupted with many new suppliers and products lacking proven track records of reliability and performance. Gareth Jones of test house Lux-TSI explores practical ways to build up compliance to the key safety and performance standards in an affordable manner, to reduce financial risk and differentiate products.
